## **HELP YOUR FOREST FIRE WARDEN PREVENT FIRES—IT PAYS!**

Prevention is one of the most important phases of all fire effort. This is particularly true of forest fire control work. Preventing forest fires preserves valuable forest growth and other property, conserves man power and permits their use in productive channels, saves taxpayers' money and conserves fire fighting equipment.

The prevention of forest fires is the most important and difficult part of the work of your forest fire warden who heads a local organization set up primarily for the security of your community's forest property. Appointed by the State Forester, upon recommendation of the Selectmen, he is charged by law with the responsibility of local administration of forest fire laws, fire prevention and suppression. In his work he is aided by deputy forest fire wardens who, in emergency, may assume his power and authority. The warden is guided in his work by instructions received from the State Forester and by the District Fire Chief who represents the State Forester.

The importance and value of the work of the forest fire warden and his deputies is, perhaps, best appreciated during hazardous periods when fire danger is greatest. The public, however, looks to him at all times for speedy and economical suppression of going fires.

To properly fulfill his mission, the warden needs the generous and understanding cooperation of the public at large. He attempts to secure this cooperation by the posting of caution notices, news items and by word of mouth, always carefully explaining the necessity of restrictions imposed. In the matter of giving cooperation, however, the public often fails.

The record shows that an average of 7,300 acres of woodland are burned over by forest fires in New Hampshire each year. Analysis of fire causes reveal the fact that more than 98 percent of all forest fires are, consistently, the result of human carelessness and are preventable.

The careless smoker fails to properly extinguish his cigar, cigarette or pipe ashes or thoughtlessly throws them from the car window; the debris burner fails or refuses to consult the warden, as the law requires when the ground is not covered with snow, before attempting to burn; campers fail to properly extinguish their fires or frequently build fires when conditions are unfavorable.

The elimination of human causes from the forest fire problem is the answer. This is not as difficult of accomplishment as it might appear at first glance. Let each one who reads this—

1. Use ordinary common sense with fire in and near woodland.

2. Comply with requirements on the use of fire in and near woodland and when the ground is not covered with snow, secure written permission to burn from the forest fire warden.

3. Be careful when smoking in or near woodlands. Don't throw lighted material from moving vehicles.

4. Cooperate with and assist the warden and urge others to do so.

5. **HELP YOUR FOREST FIRE WARDEN PREVENT FIRES**—his efforts are only as effective as is the cooperation you give him!

S. H. BOOMER.

District Fire Chief.

## REPORT OF THE SUPERINTENDENT OF SCHOOLS

February 1, 1947

To the School Board and Citizens of Brookfield:

Probably at no time in the history of the country has the attention of the people been focused so sharply on problems of education. Seldom, if ever, have these problems been so acute. Competent authorities report that during the past five years 350,000 men and women have left the teaching profession. Marked increases in the cost of supplies and the necessary increases in teachers' salaries have increased the cost of school operation to a serious degree. The tremendous problem of the war years we met and solved. The problems of peace are of no less magnitude. Careful appraisal of the adequacy of American schools to meet the need of the children and the welfare of the nation is a continuing year by year responsibility of American citizens. We made immeasurable sacrifices of life and strength and wealth to defend the basic tenet of the American way of life, that of the dignity and worth of the individual. We must still defend this tenet against hostile political faiths. That defense must be built in American schools.

American children have an assignment with destiny that is not optional. They will live in a world of incredible complexity, of racial and class tensions, of international friction, and of inevitable change. They must find their way in this world and must have the education which will help them do so.

Brookfield is most fortunate in having such an excellent teacher as Mrs. Eva Willey. Few, if any, of the smaller schools of this state excel Brookfield's Churchill School in the excellence of instruction, the scope of activities carried on, and the fine spirit shown by the pupils.

The very helpful cooperation of the School Board, Mrs. Willey, citizens, and the pupils in the Churchill School is greatly appreciated.

Respectfully submitted,  
EVERETT H. BRASIER.
